**Subject:** Re settlement.

To whom it may concern. The settlement for Microsoft is really necessary at this time. We have many problems in our country but Microsoft is not one of them. The spirit of this country is kindled by people who have ideas that bring better methods and ease to all of us. Microsoft has done that and others can do the same in a free country. The country needs Microsoft in full stride to help overcome our recession and put people back to work. With due respect to all, Karen Small tupai35@aol.com
